

## Dynamics 365 for Operations Warehouse Management System (WMS)

Microsoft Dynamics 365 for  
Finance and Operations, Enterprise edition

How about a **Fully Integrated Software Solution** that includes a professional **WMS module** that will monitor and automate your warehouse processes?

You don't need to interface anymore your WMS with the accounting and/or operational software.

Everything is in one place, all modules are integrated in Dynamics 365 for Operations (previously known as Dynamics AX) and give you possibilities to change your business in ways you have just imagined.

### Your benefits with Microsoft Dynamics 365 ERP solution

- Reduce costs and increase profitability
- Increase productivity
- Increase your customer satisfaction
- Easily manage many users
- Easily access your real data from all departments
- Increase performance on all activities: deliveries, sales, acquisitions, manufacturing, planning
- Access to your customized dashboard
- You can choose cloud or on premise

### Integrated functionalities

- WMS
- Accounting and Finance management
- Procurement and Sourcing
- Sales and Marketing
- Inventory management
- Product information management
- Project management
- Master planning
- Manufacturing
- Transportation management
- Service management
- Retail management, etc.

**WMS module in Dynamics 365 for Operations lets you manage warehouse processes in distribution, retail and manufacturing companies.**

**Workflows** - Configure inbound and outbound intelligent workflows

**Picking and packing** - Assign orders to clusters to pick from a single location and configure profiles to control the validation and packing of items into shipping containers. Alternate between picking strategies for batch and non-batch items

**Wave processing** - Create, implement, and release work using batch-scheduled or manual processing of waves

**Inventory counting** - Set up cycle counting thresholds, create cycle counting plans, schedule plans, and cycle count locations and items ad hoc

**Containerization** - Set up container groups to order the sequence of the packing process and create templates to support packing strategies

**Mobile devices** - Use scanners or other mobile devices to optimize precision in the picking and put-away processes

### What you set up in WMS module?

**Warehouses** - locations, reservation hierarchies, setup work pool, labels, location directives where to pick and put-away items, replenish locations

**Inbound processes** - pack size categories and location stocking limits, create disposition codes, shipping notice documents, use bar codes in warehouse operations

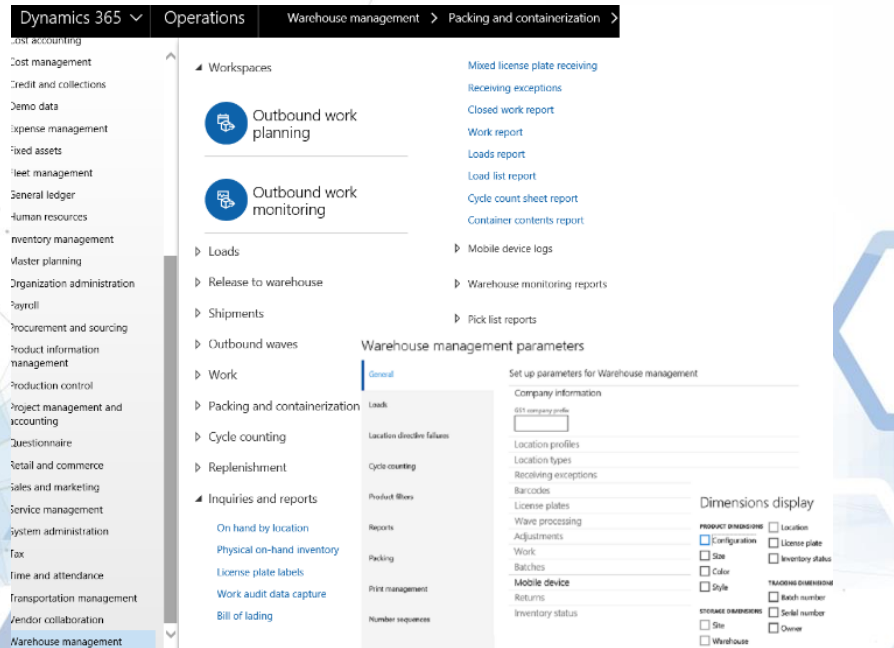

**Outbound processes** - warehouse parameters for wave processing, packing and container closing profiles for manual pack process, cluster picking, containerization, shipping carriers and carrier groups

**Mobile devices** - work orders on mobile, device menus

**Cycle counting** - cycle counting thresholds, cycle counting plans, cycle counting work

**Wave processing** - waves to create picking work for sales orders, production orders and Kanban orders

**Inbound processing** - manually run replenishment or schedule based on min and max stocking limits
